

POSTFORMED WORKTOPS

Constructed from highly durable, 0.9mm postforming grade laminate, supplied in any colour specified from a wide range available, and bonded onto either an MDF or a moisture resistant particle board core.

Lengths from 100mm to 3000mm are supplied in one piece. Lengths over 3000mm will be manufactured in more than one piece with a precise factory made joint. Standard depth is 600mm. Varying depths from 300mm minimum to 900mm maximum can be supplied if requested. Standard fascia depths are 40mm or 100mm.

Fully moulded, postformed upstands are supplied 50mm high, with the option of 50mm high loose upstands if preferred. Custom-made, pre-formed 45° mitre joints can be supplied on request. Simply specify 'ML' for a left-hand mitre or 'MR' for a right-hand mitre.

Factory finished, laminated faced ends are available when specified, e.g. 'EL' for a left-hand end or 'ER' for a right-hand end.

Loose Upstand

TIMBER LIPPED WORKTOP

0.9mm thick laminate to standard colour range, bonded on to either an 18mm thick MDF or a moisture resistant particle board core, with a softwood sub-frame under (depending on fascia depth).

Beech fascia 100mm deep as standard. However, depths varying from 20mm to 100mm are available.

Lengths and depths as for postformed worktops. Beech upstands 50mm high supplied loose.
