

The background image shows a clean, modern healthcare environment. In the foreground, there are white cabinets with multiple drawers and doors, each equipped with a silver handle. Above the cabinets is a white countertop. The ceiling is a grid of white tiles with recessed fluorescent lights and a circular ventilation grille. In the background, a wooden door is visible, and the floor is a light-colored, polished surface. A large green circle is overlaid in the center of the image, containing the company logo and text.

DAVID  BAILEY
FURNITURE SYSTEMS

Healthcare Furniture

Welcome to David Bailey Furniture Systems’ range of fitted furniture for the healthcare sector. This range of products has been specified for healthcare refurbishment and redevelopment projects since 1989. Since then, we have built an impressive portfolio, which includes prestigious NHS and private hospital contracts, care homes, mental health centres, doctors’ surgeries and clinics.

Extensive range, exceptional craftsmanship

Our extensive product range has been developed to meet the everyday needs of healthcare environments, combining good looks with durable and ergonomic design at competitive prices.

We manufacture, deliver and install

Manufactured and assembled in our own factory, our furniture is subject to rigorous quality control checks before delivery. We offer the choice of our full installation service or our fast and flexible supply only service.

Specially designed for the theatre

Suspended and mounted management systems for the storage of consumables in theatre suites are also available, which meet the specific requirements of the Health Technical Memorandums, (HTM 63 and HTM 71) as outlined by the Department of Health.

Custom-made furniture

We can make custom-made pieces to suit virtually any specification or requirement.

Environmental committment

We remain committed to reducing our impact on the environment by sourcing sustainable materials and using a carbon burner which has drastically reduced our carbon footprint.

i Pigeon Hole Units made bespoke to customer requirements

Laminate Worktops offer a durable, affordable, hygienic and easy to clean solution, which can withstand the day to day demands of a hospital environment.

Trespa Worktops provide excellent resistance to solvents, good resistance against heat and discolouration, together with excellent durability.

Corian® Worktops offer a durable, hygienic and non-porous work surface which can withstand the frequent spills and hard scrubbing required to maintain a perfectly sterile healthcare environment.

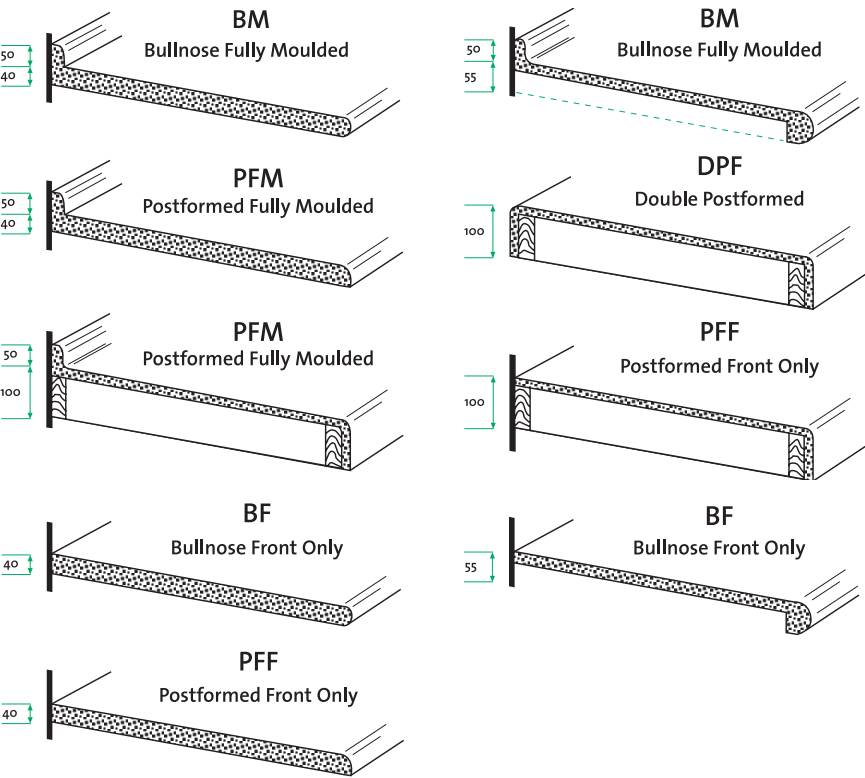

Stainless Steel Worktops are hygienic and comply with the Department of Health's Health Building Note 00-01 Part C: Sanitary assemblies (formerly HTM:64), ideal for catering rooms and laboratories.

Timber Lipped Worktops are constructed from a 0.9mm thick laminate, bonded on to either an 18mm thick MDF or a moisture resistant particle board core, with a softwood sub-frame.

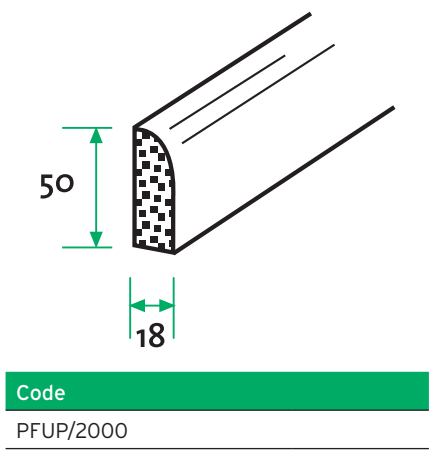

ABS Lipped Worktops are a cheaper and more flexible option, ideal for office and admin areas.

Reception Desks & Nurses’ Stations

At David Bailey, we pride ourselves in being able to offer you high quality, bespoke reception desks and nurses’ stations – allowing you the freedom to be creative in your design.

Legislation, such as Part III of the Disability Discrimination Act (DDA) and the revised British Standard BS8300, all point to the need for design to be more inclusive.

Therefore, when designing the counter, provision should be made to incorporate sections for people to access from both standing and seated positions.

BS8300 provides invaluable advice on dimensions for the counters – in particular the lower section, which would be accessed by wheelchair users or people who are seated.

If you would like further information on our bespoke service, or advice on the exact dimensions specified in BS8300, please feel free to contact us.

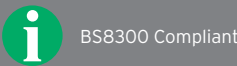

Design and Drawing Service

We offer a design and drawing service allowing us to work with you to create a fully bespoke desk design suitable for your needs.

Inclusive Design

It is essential that reception desks are designed with accessibility in mind. During the design process we ensure provisions are made for access from both standing and seated positions.

Custom-made Furniture

Our bespoke service offers architects and specifiers the opportunity to create custom-made furniture for the most exacting design brief. Clients value this proven capability and we pride ourselves on a flexible approach.

Working to your specification and drawings, our in-house team of experienced craftsmen produce high quality bespoke furniture. Where required, we are also happy to offer a site visit.

Manufactured to the same high standard as our other product ranges, the David Bailey custom-made furniture service provides the solution to specific and individual design and build requirements. We are frequently called upon to produce items for the following areas:

- Wall panelling
- Specialist joinery
- Reception areas
- Office furniture
- Wall storage

N.B. Our bespoke service is only available for high-value contracts.

Fixtures, Fittings & Equipment

We regularly supply and install the following fixtures, fittings and equipment for healthcare contracts:

- Curtain Tracks**
For bedrooms and other areas where ultimate privacy is required.
- Drugs & Medicine Cabinets**
That conform to the current British Standard BS2881 (1989) - Specification for cupboards for the storage of medicines in healthcare premises.
- Grab Rails**
For bathrooms and ward areas, all extruded from high quality PVC plastic that has been UV stabilised to prevent discolouration.
- Sinks**
Stainless Steel Sinks for clinical and hand washing areas, for fitting into worktops or for fitting onto sink units
- Noticeboards & Whiteboards**
To facilitate communication between hospital staff and patients and their families.
- Coat Hooks**
A wide variety of wall-mounted coat and hat hooks for hospital changing rooms and ward areas.
- Mirrors**
Specifically designed for the hospital environment, where public safety is of prime importance.

HTM 63 Storage Units

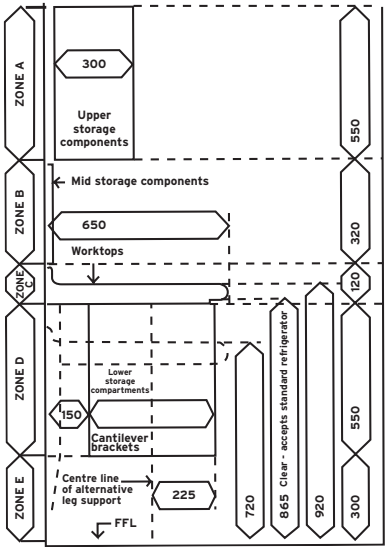

David Bailey Furniture Systems offers a range of fitted furniture that meets the specific requirements of the HTM 63 (Health Technical Memorandum).

Originally designed by the Department of Health, the HTM 63 sets out a range of storage units and worktops of unique design for use primarily in health buildings. This range of suspended storage units and worktops is manufactured to a high specification, featuring a melamine faced MDF carcass.

The suspended style makes them ideal for theatre suites or where a particularly rigid floor cleaning regime is required. The HTM 63 system has been designed on five specific zones A to E, as shown below.

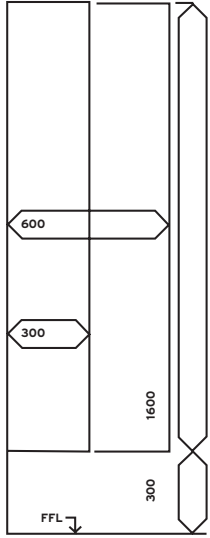

600 Assemblies

- Zone A.** Upper storage components
- Zone B.** Mid storage components
- Zone C.** Worktops and support systems
- Zone D.** Lower storage components
- Zone E.** Clearance under lower storage components for floor cleaning

i Upper and lower storage components are in 500mm, 600mm and 1000mm widths. Tall storage components are 600mm wide.

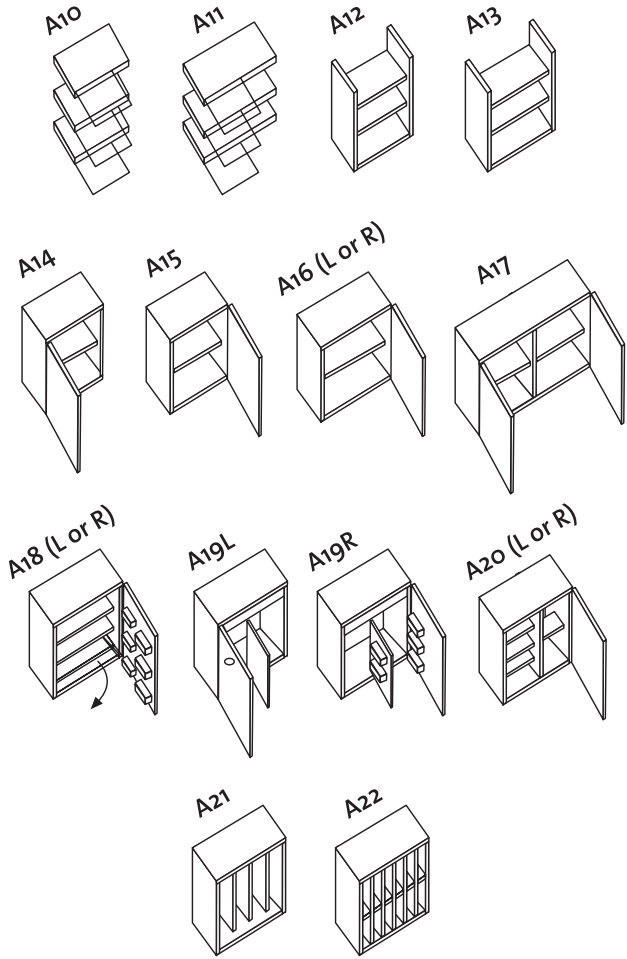

Tall Storage Components

- Also available in this range, but not illustrated, are:
- A.** Shelving
 - B.** Staff bases
 - C.** Reception counters
 - D.** Mobile units*

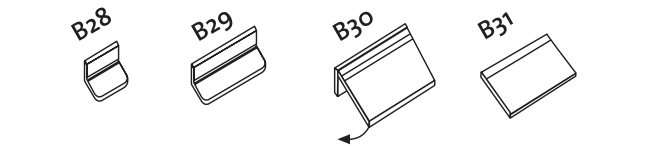

i *The majority of the lower storage components may be fitted with tops, legs and casters for use as mobile "under bench" storage.

HTM 71 - Storage of Consumables & Equipment

A further range is available from David Bailey Furniture Systems that meets the specific requirements of the Health Technical Memorandum 71 - Materials management modular storage, as outlined by the Department of Health.

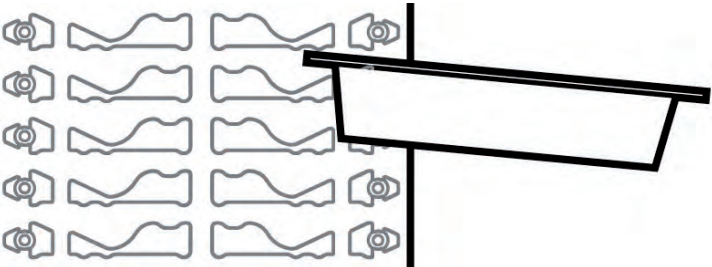

All of the products in our HTM 71 range offer space saving modular storage systems ideally suited for the management and storage of consumables and equipment in healthcare buildings.

The products offered are a result of extensive research and development in response to the real-life situations encountered by healthcare professionals in their working environment.

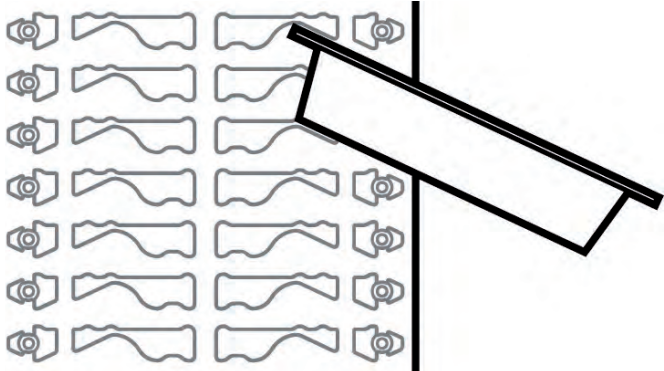

- These include:**
- Drugs regulations
 - Infection control
 - Health and safety
 - Space restrictions
 - Time constraints
 - Good working practices
 - Increased use of disposables

OPTION. 1

OPTION. 2

All of our HTM 71 units are available free standing or wall-mounted. We can supply tall units, base units and wall units with shelves, or with plastic liners for integrating with plastic trays.

Angled liners are fitted as standard throughout our unit range. They are also available as a standard panel for self fit applications. The liner can be fitted in two ways:

Option 1) turned through 180° for the smoothest horizontal tray retrieval.

Option 2) at a 30° angle so that trays spring down for ease of stock retrieval at a high level.

HTM 71 Specialist Cupboards

We offer two types of cupboard. Our catheter cupboard offers formed plastic liners, a catheter hanging shelf and a catheter rail. Our endoscopy cupboard also comes equipped with formed plastic liners and two solid grade laminate endoscopy shelves. Cupboard doors are available in a variety of laminate colour options. Carcase material is available in grey or white melamine.

HTM 71 Accessories

Polycarbonate trays are available in a variety of different sizes to offer versatility for the storage of consumables and equipment.

400 x 300 x 200	MSC/PT/4/3/200

Integrated Panel Systems

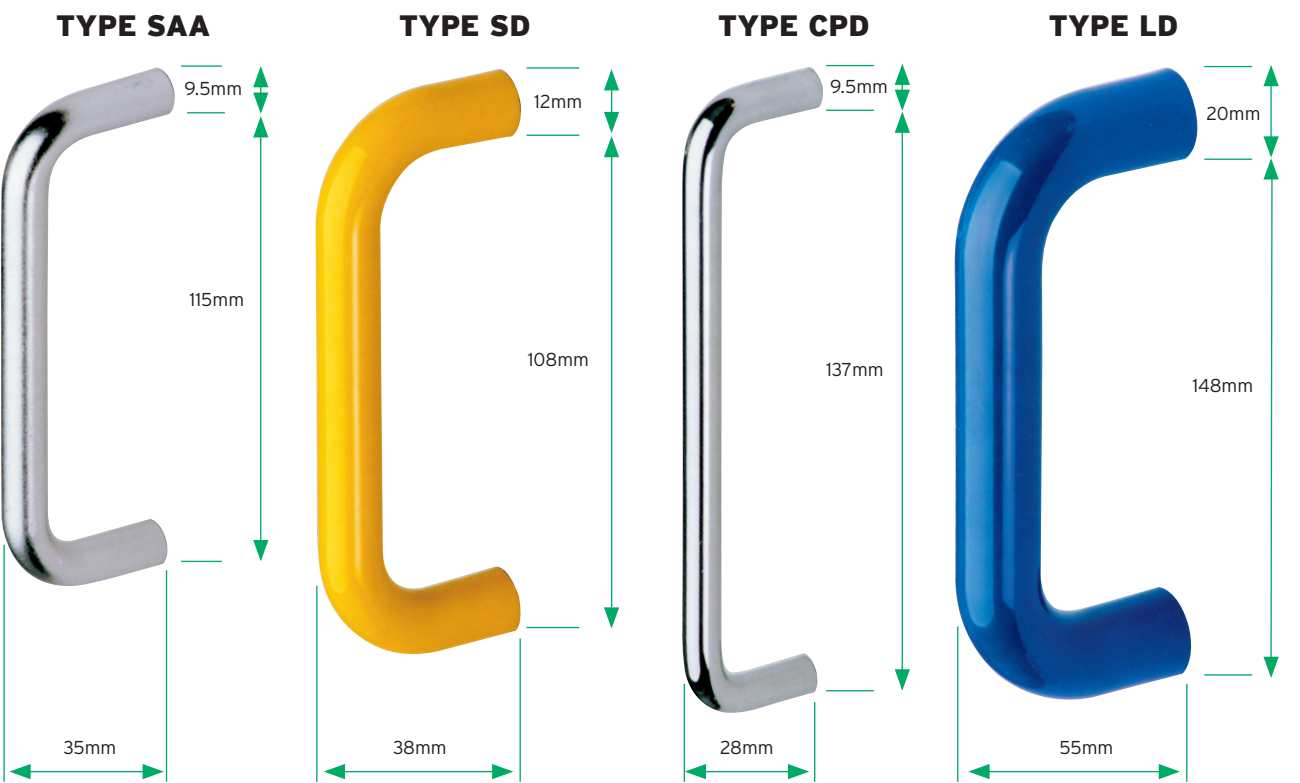

Integrated Panel Systems (IPS) conceal pipework and ducting, creating the perfect finish in healthcare washroom areas.

Tailor-made to your requirements, we can manufacture close butted panels without horizontal flash-gaps in either square edged or post formed panels.

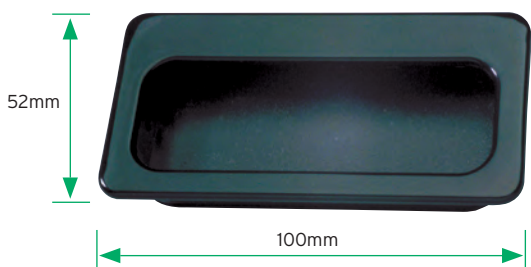

We provide a full design, manufacture and project management service and will coordinate installation with other trades to ensure a fast turnaround.

Just some of the types of IPS systems we supply include sanitary ware panels, sink panels, and WC panels.

'D' Handles

Recessed Handles

The recessed handle, made from nylon, is glued and screwed into the unit doors and drawers. Recessed handles are available in three colours: black, white and dark grey.

Colour Choice

We offer four types of 'D' handle and a recessed handle option for our healthcare storage units.

Both small and large 'D' handles are made from nylon and available in the colours shown. The polished chromium plated 'D' handle and SAA handle are made from die-cast steel. All 'D' handles are fixed by two countersunk screws through the back of the doors and drawers.
